DATE MAILED: 03/17/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)	<u> </u>
Office Action Summary	Application No.	Applicant(s)	
	09/530,844	KATO ET AL.	
	Examiner	Art Unit	
	M. Alexandra Elve	1725	
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).			
Status			
1) Responsive to communication(s) filed	lon .		
•	b)⊠ This action is non-final.		
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.			
Disposition of Claims			
 4) Claim(s) 1-23 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) 8-11 is/are allowed. 6) Claim(s) 1-4,6,7 and 12-23 is/are rejected. 7) Claim(s) 5 is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement. 			
Application Papers			
9) The specification is objected to by the Examiner.			
10)⊠ The drawing(s) filed on <u>14 June 2000</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.			
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).			
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.			
Priority under 35 U.S.C. § 119			
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-7, 12-18 & 20-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Kato et al. (US Pat. 5,792,432).

Kato et al. discloses a catalytic unit constructed of alternately stacked rectangular catalytic elements, enclosed in a housing. The ribs of the catalyst elements are inclined at an angle of 0 to 90 degrees. Turbulent currents are generated downstream promoting ammonia and NOx contact and hence denitrating. Catalytic members may be constructed of plate, mesh, non-woven or fibrous materials and contain titanium, vanadium, molybdenum or tungsten. Corrugated catalytic elements have a step shape and may have holes that correspond to a perforated base plate. (abstract, all figures, col. 1, lines 15-40, col. 3, lines 1-17, col. 4, lines 31-35, 54-58, col. 6, lines 51-67, col. 15, lines 61-67, col. 29, lines 52-67, col. 30, lines 1-13, claim 1)

Application/Control Number: 09/530,844

Art Unit: 1725

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kato et al. as stated in the above paragraph and further in view of Yoshida et al. (US Pat. 5,155,083).

Kato et al. does not teach the use of a inorganic binder (reinforcing agent) in the catalytic element.

Yoshida et al. discloses a catalyst for reducing nitrogen oxides and ammonia in an exhaust gas. The inorganic fiber cloth is impregnated with at least one inorganic oxide. It would have been obvious to one of ordinary skill in the art at the time of the invention to use an inorganic oxide to impregnate (reinforce) the catalytic cloth element because of the high thermal and strength properties the oxide imparts to the cloth.

Allowable Subject Matter

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 09/530,844

Art Unit: 1725

Claims 8-11 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach (a) that the length of the catalytic element is an integral multiple of the sum of the height of the level-changing portions and the length of the flat plate portions or (b) a relation of $\mathbf{W} = \mathbf{n} \times \mathbf{L} + \mathbf{L} - \mathbf{d}$, whereby W is the whole length of a catalytic element, L is the distance between the adjacent level-changing portions, n is the number of level-changing portions per one sheet of element and d is a constant.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Alexandra Elve whose telephone number is 571-272-1173. The examiner can normally be reached on 6:30-3:00 Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on 571-272-1171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
